

Hear the conversation. Not the commotion. Axio ST with SpeechTrax is the easy choice.

The new Axio ST combines the power of SpeechTrax with Dynamic Directional Detection – technologies designed to preserve speech understanding in noisy situations.

New SpeechTrax is only available on Axio ST hearing aids.

SpeechTrax is one of the biggest advancements to ever happen to hearing aids. This revolutionary noise reduction technology is so fast and sophisticated, it is designed to reduce the background noise between syllables of speech. It can isolate just what you want to hear, so you can carry on a conversation at a sporting event without getting sidelined by the crowd.
